

Marcus Vance

Lead Full-Stack Python Developer

Email: marcus.vance.dev@example.com | GitHub: github.com/marcusvance | Location: Austin, TX

PROFESSIONAL SUMMARY:

Versatile Full-Stack Python Developer with 5+ years of experience building high-throughput web applications, RESTful APIs, and responsive frontends. Deep expertise in Python, FastAPI, Django, PostgreSQL, HTML5, CSS3, JavaScript, Docker, and AWS cloud infrastructure.

TECHNICAL SKILLS:

- Backend: Python, FastAPI, Django, Flask, SQLAlchemy, Celery, RESTful API design
- Frontend: JavaScript (ES6+), HTML5, CSS3, Responsive Design, DOM manipulation, UI/UX
- Database: PostgreSQL, MySQL, Redis, Database migrations, SQL query optimization
- DevOps & Cloud: Docker, AWS (EC2, S3, RDS), Git, GitHub Actions CI/CD, Nginx, Linux
- Testing & Methodologies: Pytest, Test-Driven Development (TDD), Agile/Scrum

EXPERIENCE:

Senior Full-Stack Developer | CloudPeak Systems (2021 – Present)

- Architected and deployed scalable REST APIs in Python using FastAPI and Django.
- Built responsive, accessible user interfaces using semantic HTML5, modern CSS3, and JavaScript.
- Managed PostgreSQL database schema design, index tuning, and data migration scripts.
- Configured CI/CD deployment pipelines using Docker containers and AWS EC2/S3.

Full-Stack Software Engineer | ByteWorks Inc (2019 – 2021)

- Developed backend microservices in Python with Flask and PostgreSQL.
- Implemented interactive front-end dashboards using vanilla JavaScript, HTML, and CSS.
- Wrote extensive unit tests in pytest and integration tests to ensure system reliability.

EDUCATION:

- B.S. in Software Engineering, University of Texas at Austin (2019)
